INTRODUCTION

The FAO has projected that from 2001 to 2050 global meat and milk production will double and given the expected expansion, adequate feed supply is crucial to sustain the global livestock industry. Feed prices have remained high as the effect of climate change has negatively impacted on world feed grain production with decreased crop yields in many regions. Another factor is the shift in the use of corn as feed and food to biofuel production.

The future of sustainable livestock production thus lies in producing more from less by enhancing feed efficiency as in the poultry industry. In addition, livestock production especially from the ruminant sector is estimated to contribute about 18% of all greenhouse gas emissions, a major factor in climate change. Changing ruminant feeding strategies and enhancing efficiency can help to curb methane emissions.

To ensure a sustainable and more efficient livestock production, collaborative research efforts and finding positive ways to deal with the public perception of the livestock industry is crucial. The present high feed prices and effects of climate change offer an opportunity for scientists, academicians, policy makers and representatives from the feed, poultry and livestock industry to look at past and present research work on feed production and utilization, speculate on future directions, explore new ideas, and come out with practical, effective and economical suggestions for feed substitution, enhancing feed efficiency and sustainable livestock production.

The previous three International Conferences on Animal Nutrition has helped to foster strong linkages and networking between industry participants and their counterparts in research, academia, regulatory and policy-making agencies for the betterment of the industry.

The fourth ICAN “Sustainable Feeds - Maximizing Productivity and Profitability” is organized by MARDI and the programme for ICAN 2010 includes a strong focus on recent advances in nutrition as well as on broader topics on feed substitution and production, natural alternatives to AGPs, enzymes supplementation, feed and food safety, novel feeds, feeding strategies to mitigate methane production and new feed processing technologies.

OBJECTIVES

- To highlight recent advances in animal nutrition, feed substitution, feed utilization, feed processing, feed hygiene, natural alternatives to AGPs and food safety
- To promote technologies in feed processing
- To strengthen linkages among researchers, feed and livestock producers and policy makers, and find solutions to industry-related problems

TOPICS FOR DISCUSSION

Several internationally renowned scientists from overseas and locally will present on the following topics:

- Feed supply and implication for the Asia-Pacific Region
- Domestic feed production and substitution
- Alternatives to AGPs
- Recent advances in animal nutrition
- Feed processing technologies
- Enzyme supplementation
- Enhancing nutrient utilization
- Food safety and bio-security
- Feeding strategies for mitigating greenhouse gases production
- Feed conservation strategies
- GM feed
- Feed information

WHO SHOULD ATTEND?

- Animal nutritionists
- Academicians
- Researchers
- Feed millers
- Feed technologists
- Extension agents
- Policy makers
- Entrepreneurs
- Livestock producers

CALL FOR PAPERS/POSTERS

Participants are invited to contribute papers to ICAN 2010. There will be both oral and poster presentations. Oral presentations comprise both invited and selected papers. Authors are required to submit a short abstract (maximum 250 words) and the full paper (INTRODUCTION, MATERIALS and METHODS, RESULTS and DISCUSSION, and REFERENCES) in English including figures, tables and photos (maximum 3 pages for poster papers) in Microsoft Word document. The paper format is as follows: A4 paper; 1 inch margins (top and bottom) and 1.25 inch from the left and right; Times New Roman font, size 12; single spacing. The paper title, authors' names and addresses should be at the top of the first page. Abstracts and full papers are to be sent to the Technical Committee. Deadline for submission of the abstract and full paper is on **30 June 2010**. Papers received after this date will not be included in the proceedings.

LANGUAGE

The official language of this conference is English.

CONFERENCE TECHNICAL TOUR

A tour will be arranged for registered participants. Seats are limited and available on a first come first served basis.

ADVERTISEMENT AND EXHIBITION

Companies are invited to advertise in the conference souvenir programme and exhibit their products and technologies during the conference.
